Professional Summary

Business Analyst and Product Management intern with experience in requirement gathering, workflow mapping, process optimization, stakeholder coordination, and data-driven decision making. Skilled in SQL, Power BI, Excel, documentation, and business analysis across product, operations, and analytics projects. Seeking to contribute to business transformation and technology initiatives through structured problem solving and cross-functional collaboration.

Education

Manipal University Jaipur

2022 – 2026

B.Tech Computer Science & Engineering (IoT & Intelligent Systems)

Jaipur, Rajasthan

Experience

SwitchiT

Jan 2026 – Present

Product Management Intern

Bengaluru, Karnataka

- Collaborated on **requirement gathering, workflow mapping, process flows, and documentation** for product and operational initiatives, translating business requirements into actionable workflows with cross-functional stakeholders.
- Supported **process improvement and AI-driven automation initiatives** to streamline execution, reduce manual effort, and track implementation progress across product and engineering teams.

Infosys Springboard

Oct 2025 – Dec 2025

Machine Learning Intern

Remote

- Designed an **AI-powered visa eligibility system** using RAG, semantic retrieval, and LLM-based reasoning, supporting solution development and deployment on cloud infrastructure.
- Performed **system testing, validation, issue analysis, and QA documentation** to evaluate solution accuracy and ensure alignment with business and functional requirements.

Shark Exports

May 2025 – Aug 2025

Business Development & Operations Intern

Thane, Maharashtra

- Conducted **market and competitor research across African markets** and prepared quotations, pricing sheets, and client proposals to support commercial and pricing decisions.
- Coordinated **export logistics, shipment tracking, documentation, and compliance reporting**, supporting smooth execution of international business operations.

Projects

Bank Customer Churn Analysis | Python, SQL, Excel, Power BI

- Analyzed **10,000+ customer records** using SQL, EDA, statistical testing, and segmentation to identify key churn drivers, and built a **2-page Power BI dashboard** for demographic, account, and churn analysis.

Olist E-Commerce Analytics | Python, SQL, Excel, Power BI

- Analyzed **100K+ orders** using SQL to uncover revenue, delivery, seller, and customer satisfaction trends, and built **Power BI dashboards** tracking GMV, delivery performance, and regional demand.

Business Performance & Marketing Analytics | Python, SQL, Excel, Power BI

- Analyzed **45K+ customer interactions** using SQL and segmentation to identify conversion drivers and high-performing customer profiles, and built a **Power BI dashboard** tracking conversion, campaign efficiency, and segment performance.
